EDUCATION

Thapar Institute of Engineering and Technology, Patiala

Expected Graduation: 2029

B.E. in Computer Science and Business Systems

CGPA: 9.38/10 (Semester 1)

PROJECTS

Ranked Voting System

[Source Code](#)

C++

- Implemented the Tideman (ranked pairs) algorithm to determine election winners based on voter preferences
- Built pairwise comparison logic and sorted candidate pairs by strength of victory
- Designed a directed graph with cycle detection to ensure valid locking of pairs
- Applied data structures including graphs, arrays, and sorting algorithms to simulate real-world voting systems

Hash Table-Based Spell Checker

[Source Code](#)

C++

- Developed a spell checker using hash tables with separate chaining for efficient word lookup
- Engineered dictionary loading and management for large datasets
- Implemented word suggestion functionality for misspelled inputs
- Optimized average-case lookup time using hashing techniques

SKILLS

- **Languages:** C++
- **Core Concepts:** Data Structures & Algorithms (Arrays, Hashing, Graphs, Sorting)
- **Tools:** Git, GitHub

COMPETITIVE PROGRAMMING

- Codeforces Rating: 839
- Regular practice of data structures and algorithmic problem solving

ACTIVITIES

YouTube Channel Creator

- Created and managed a YouTube channel demonstrating consistency and content creation
- Developed communication and presentation skills through regular uploads
